Weston Favell CE Primary School

## Calculation Guide

$$
\text { Year } 2
$$

This calculation guide will demonstrate the written calculation strategies that are covered for addition, subtraction, multiplication and division.

Practising these will help in preparation for Year 3 and beyond!

If you have any questions or need any further support, please ask your class teacher and they will be happy to help you.

## Addition

$$
8+9=17
$$

## Example question: 35 + 26

A part/part whole model

Drawing Base 10 Equipment

## Partitioning tens and ones and adding them together

$50 \quad 11=61$

A number line

## $17-9=8$

## Subtraction

## Example question: 41-19

A part/part whole model

## A bar model

## A number line

We can then take away using a cross out method:

## Multiplication

## $12 \times 7=84$

factor $\times$ factor $=$ product

## Example question: $7 \times 3$

Exploring 7 lots of 3 and how it has the same product as 3 lots of 7.
(Commutativity)

## Exploring Arrays and Commutativity

$7 \times 3=21$
$3 \times 7=21$

| $\boldsymbol{?}$ |  |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| $\mathbf{3}$ | $\mathbf{3}$ | $\mathbf{3}$ | $\mathbf{3}$ | $\mathbf{3}$ | $\mathbf{3}$ | $\mathbf{3}$ | | A bar model |
| :--- |

7 Equal groups of 3

A number line

## Division

$$
12 \div 4=3
$$

## Example question: $\mathbf{2 4 \div 3}$

Sharing in equal groups: I have 24 counters and I have shared them equally between 3 .

Grouping in equal groups: I have 24 counters and I have grouped them into groups of 3 . I have 8 equal groups of 3 .

| 24 |  |  |
| :---: | :---: | :---: |
| $?$ | $?$ | $?$ |

## A bar model

## Times Tables

In Year Two, children start to learn their time tables facts alongside their corresponding division facts e.g. $3 \times 2=6$ so $6 \div 2=3$.

The facts the children should focus on learning are the 2,5 and 10 times tables. It helps children to apply this information fluently and with pace by the end of the year.

Children need to learn the times tables highlighted in the table below in order:

- $0 \times 2=0$
- $1 \times 2=2$
- $2 \times 2=4$ etc.

Then they need to be able to answer in any order e.g. $4 \times 2=8,12 \times 2=24,2 \times 2=4$

| x | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | 1x1 |  |  |  |  |  |  |  |  |  |  |  |
| 2 | 2x1 | 2x2 |  |  |  |  |  |  |  | Year 2 |  |  |
| 3 | $3 \times 1$ | $3 \times 2$ |  |  |  |  |  |  |  |  |  |  |
| 4 | $4 \times 1$ | $4 \times 2$ |  |  |  |  |  |  |  |  |  |  |
| 5 | $5 \times 1$ | $5 \times 2$ | $5 \times 3$ | $5 \times 4$ | $5 \times 5$ |  |  |  |  |  |  |  |
| 6 | $6 \times 1$ | $6 \times 2$ |  |  | $6 \times 5$ |  |  |  |  |  |  |  |
| 7 | 7x1 | 7x2 |  |  | 7x5 |  |  |  |  |  |  |  |
| 8 | $8 \times 1$ | $8 \times 2$ |  |  | $8 \times 5$ |  |  |  |  |  |  |  |
| 9 | $9 \times 1$ | $9 \times 2$ |  |  | $9 \times 5$ |  |  |  |  |  |  |  |
| 10 | 10x1 | 10x2 | 10x3 | 10x4 | 10x5 | 10x6 | 10x7 | 10x8 | 10x9 | $10 \times 10$ |  |  |
| 11 | $11 \times 1$ | $11 \times 2$ |  |  | $11 \times 5$ |  |  |  |  | $11 \times 10$ |  |  |
| 12 | $12 \times 1$ | $12 \times 2$ |  |  | $12 \times 5$ |  |  |  |  | $12 \times 10$ |  |  |

Focus on the commutativity of the times table when practising at home. If I know $3 \times 5=15$, I also know $5 \times 3$ is 15 ! This is represented in the table above.
